Atzu: Photo & Video Cleaner

Formerly RefreshMyPhone · Fact sheet · November 2026

Atzu: Photo & Video Cleaner frees up space on your iPhone or Android phone. It finds duplicates, similar shots, blurry photos, old screenshots and big videos, and shows what each clean-up would free. Photos are checked on the phone, nothing is uploaded, and nothing is deleted until you say so.

What it is	Storage cleaner for photos and videos on iPhone and Android
Platform	iPhone with iOS 17 or later; Android 11 or later
Availability	On the App Store as Atzu: Photo & Video Cleaner, and on Google Play as Atzu: Photo & Video Cleanup
Finds	Exact duplicates, bursts and near-identical shots (with the best one picked), blurry photos, old screenshots, the largest videos
Shrinks	Compresses videos with a size estimate first; keeps a Live Photo's or motion photo's picture without its video; on iPhone, moves videos to iCloud Drive
Free extras	Smart Settings: the phone's own settings that save space, measured on your library. Storage Guide: what the rest of storage is and where to act on it.
Price	Free to download and scan. €9.99 a year unlocks every clean-up, the same on iPhone and Android (or the local store price). No ads.
Languages	English, German, French, Spanish, Italian, Japanese
Maker	Caddora, Naas, Co. Kildare, Ireland

Safe by design

- **Review before anything goes.** Every clean-up has a review screen, and the phone asks you to confirm.
- **Recoverable for 30 days.** Deleted photos go to Recently Deleted on iPhone, or the gallery's bin on Android.
- **Favourites and recent photos** are protected by default.

What it will not claim

It cleans photos, videos and files. It does not boost a phone, clear other apps' caches or empty System Data, because neither iOS nor Android lets any app do that. The Storage Guide explains how to deal with those instead.

Privacy

No account, sign-up or email address, and no ads. Photos are analysed on the phone and never uploaded. The Android app has no internet access at all.
